Project Name : Single Thread

```
public class Single_Threading {  
  
    public static void main(String[] args) throws Exception {  
  
        for (int i = 1; i <= 100; i++) {  
            // sleep for particular time or duration  
            Thread.sleep(2000);  
            System.out.println("Thread = " + i);  
        }  
  
    }  
  
}
```
