Name : Dinesh Tulshiram Ingole
Project Name : File Reader

---

1) File Reader Program :

```java
import java.io.*;

public class FileRead1 {

    public static void main(String[] args)  {
        try {
            File obj = new
File("C:\\Assignments\\Empdetails.txt");
            FileReader fir = new FileReader(obj);
//          int data = fir.read();
            System.out.println(obj.length());  // . length() is use
to calculate the no of length of our file
            for (int i = 0; i < obj.length()-1; i++) { // for loop is
easy to use at the time of u know the ending point of our space
                System.out.print((char) fir.read());

        }

        } catch (Exception e) {
            System.out.println(e.getMessage());

        }

    }
}
```

Output :
